Summary

Experienced software developer specializing in frontend and backend development, most recently leading a team at Staples Inc. Implemented key UI enhancements, resulting in a 15% boost in conversion rates, and reduced deployment time significantly by optimizing CI/CD processes. Looking to leverage expertise in React and e-commerce platforms to drive user engagement and streamline performance in future projects.

Skills

- Javascript, Next.js, Node.js, React, Machine Learning, Object Oriented Programming, Microservices, Cypress, TypeScript, SEO, NoSQL, MongoDB, LLMs, Electron, NestJS, GraphQL, Rest APIs, Scrum Methodology, Agile Methodology, HTML5, CSS, Redis, Docker, Jest, React Testing Library, Software Testing, ElectronJs

Work Experience

Staples Inc. | *Team Lead - Contractor*

Jul 2023 - Present

- Developed and maintained Shopify storefronts and React.js components, improving site functionality, reducing page load times by 20%, and enhancing the overall shopping experience.
- Redesigned and optimized key UI components, increasing customer engagement and boosting conversion rates by 15%.
- Led and mentored a team of 5 developers, conducting code reviews, defining best practices, and improving sprint delivery timelines by 25%.
- Managed deployments and CI/CD pipelines across multiple environments, reducing release errors by 40% and cutting deployment time from hours to minutes.
- Collaborated with cross-functional teams (design, product, QA, and marketing) to deliver scalable, customer-focused eCommerce solutions aligned with business goals.
- Improved workflow efficiency by streamlining development and deployment processes, reducing downtime and accelerating feature rollout cycles.
- Designed and built a fullscreen, touch-friendly in-store kiosk application in Electron.js for an eCommerce client, enabling secure browsing restricted to the client's store.

Telus Communications Inc. | *Senior Software Engineer - Contractor*

Jan 2022 - Jul 2023

- Developed and maintained frontend applications in React, improving UI responsiveness and user experience for Telus customers.
- Implemented Backend-for-Frontend (BFF) architecture using Node.js/NestJS, optimizing API calls and reducing over-fetching by 30%.
- Built and integrated scalable backend services, improving system reliability and supporting 2× traffic growth.
- Collaborated with cross-functional teams to streamline development workflows, reducing feature delivery time by 20%.
- Implemented GraphQL queries and mutations with Apollo, reducing over-fetching and cutting API payload sizes by 15%.

Freedom Mobile Inc. | *Software Engineer - Contractor*

Aug 2019 - Jan 2022

- Redesigned and optimized UI components in React, improving app usability and modernizing the user experience.
- Rebuilt and refactored page-level components, enhancing page load speed and overall performance by 20%.
- Implemented responsive, reusable components, ensuring consistency across multiple devices and reducing development time for new features.
- Collaborated with design and product teams to align UI improvements with business goals, increasing customer satisfaction and engagement.

Crewlogix Pvt Limited | *Software Engineer*

Feb 2019 - Aug 2019

- Developed JavaScript-based software solutions, improving application performance by 25% and enabling seamless scalability to support 2× user growth.
- Advocated for JavaScript best practices and coding standards, reducing technical debt and increasing team productivity by 15%.
- Interviewed, evaluated, and hired technical talent, building a high-performing team that consistently met project deadlines.
- Designed and delivered advanced web applications, improving feature richness and enhancing user satisfaction scores by 20%.
- Built modern, reusable UI components, improving application responsiveness and reducing UI development time by 30%.

ThirtyNorth Dev Pvt. LTD | *Junior Software Engineer*

Feb 2018 - Jan 2019

- Contributed to the development and maintenance of PHP-based web applications, improving code efficiency and reducing page load times by 15%.
- Assisted in building and optimizing Laravel applications, enhancing user experience and reducing server response times by 20%.
- Supported AWS cloud infrastructure management, ensuring 99.9% uptime and helping lower operational costs through resource optimization.
- Participated in project management using Jira, improving team communication and helping deliver projects on schedule.
- Applied Test-Driven Development (TDD) with Jest, Enzyme, and react-testing-library, increasing code reliability and reducing post-deployment bugs by 15%.
